Q: This line was deleted by a moderator (without

notification) I asked this question: Filtering

non-alphabetical chars on a string in C on

Stack Overflow, and I suggested in the

comment section that it would be preferable

to use an array rather than strchr. In the

morning, I see that it was deleted by a moderator, without notification. I don't quite understand the "why": is there a better place to ask this? I try to post this question here, and I am told I can't, so I post it in meta instead. A: The answer has to do with how moderators work and there is no good place to discuss it, so here goes: Moderators are human beings, like the rest of us, and do things for all sorts of reasons: Moderator actions are automatically hidden from the mods' themselves as well as everyone else (hence the reason for the quote) for a period of time (usually about 2 weeks, but it is different for each moderator). As such, it is not appropriate to point at them when discussing it. Understandably, once that time is up, everyone is allowed to see it and discuss it. So long as you don't ever start

giving any of them a hard time about it, the most they can do is shrug and say "We're not going to disclose that. It's just not our place to do that." If you really want to talk about it, I suggest you send a mail to the Stack Exchange moderation team and ask them why you were banned. If you want to know what sort of things that might be, read: Why are some of my posts deleted, and other posts not? *k. Suppose $2*x + x - 5*p - 87 = 0$, $-k*x + 4*p + 90 = 0$
