Resize Volumes Create Bootable Media

Creating bootable media

Paragon CampTune bootable media boots your Mac in macOS Recovery mode and allows for resizing system disk volumes when System Integrity Protection (SIP) is enabled or when your macOS fails to start.

Paragon CampTune bootable media requires:

- USB-flash stick or any other external media which size is larger than 900 MB.
- Native macOS Recovery HD volume.

Select a destination disk, and then click Continue.

 AppleAPFSMedia (27,18 GB)	 SanDisk Cruzer Force Media (7,45 GB)	 Samsung SSD 840 EVO 120G Media (111,79 GB)
--	---	---

 **The data on the selected disk will be lost after it is formatted.**
